Calculating electronegativity difference worksheet

Science in Action with Boardworks Explore science with engaging and varied teaching material like exciting interactive activities, dynamic animations, summary quizzes and virtual experiments. With hundreds of ready-made yet customizable presentations, Boardworks gives you everything you need to teach exciting, inspirational lessons. Companion teachers' notes support lesson planning and delivery of best practices in concordance with the NGSS and state standards. Digital labs provide engaging experiments focused on inquiry and content exploration to supplement the scientific process. Interactive simulations bring an understanding of abstract scientific models to life, whether in the classroom or learning remotely. Robust presentations have appealing graphics with real-world examples, utilize key vocabulary, and create opportunities for learners to demonstrate understanding.
